

Material Use Memo

Haldon Manufacturing, Sydney

The material cost to produce our cars consists almost entirely of the costs of steel, glass, rubber, and paint. The costs of other materials, such as plastics and fabrics, are negligible.

Below are the mounts of resources currently needed to produce each of our three 2021 models:

Material	Cubic	Traveller	Adventurer
Steel	400	500	520
Glass	50	70	40
Rubber	70	80	150
Paint	30	40	50

Table 1: amount of material per car (kg/car)
